

M-Scan

Analysis for Loss Adjusters

M-Scan provides specialist analytical services for Solicitors, Insurers and Loss Adjusters including:-

- **Specific analysis of organic contaminants in cargos, both road and marine.**
- **Speciation, sourcing and timing of petroleum product inputs into contaminated sites.**
- **Detailed compositional analysis of land, water and sediments contaminated by petrochemicals, detergents and industrial waste.**
- **Analysis of the smoke and nuisance odours in vehicles, commercial and domestic property**
- **Analysis for potentially sourcing the damage to clothing, furniture and fittings by smoke, nuisance odours and stains (eg. paint, adhesives, toiletries, perfume, foodstuff, oil, grease, etc).**
- **Characterisation of taints in food.**
- **Detailed correlation of fuels/accelerants and fire debris analysis in arson investigations, including identification of the brand of petrol.**
- **Accidental or malicious adulteration of fuel.**
- **Identification of patent infringement by detection of process indicative impurities.**
- **Witnessed analysis both in our own labs and third party premises.**
- **Expert testimony.**
- **Consultancy, including ‘cold case review’ of fire investigations and chemical analysis casework.**
